

# LEADERS IN VIBRATION SUPPRESSION TECHNOLOGY

VIV Solutions™ is the industry's leader in vortex-induced vibration suppression technologies. Our business model focuses solely on meeting the challenge of reducing vortex-shedding forces on subsea structures. We are known as the "VIV Suppression Experts" and are pleased to offer the following to our customers:

#### Experienced Personnel

- Proven track record of successful project deliveries
- Over seventy-five (75) years combined VIV expertise among team members
- Pioneered the use of tall helical strakes which have become the industry standard
- Discovered and developed the short fairing concept which is, by far, the most popular fairing in use today
- Completed the first successful installations of retrofit fairings and s-lay fairings
- Conducted more than seventy (70) test programs on VIV and VIV suppression devices

#### Unique Business Model

- Focused solely on VIV suppression
- Continue to develop new methods and products to mitigate VIV
- Many patents pending

#### Commitment to Quality and Safety

- Maintain an ISO-compliant quality program
- Assemble project-specific plans prior to commencement of manufacturing
- Conduct regular safety audits before and during production
- Perform full-scale factory acceptance testing prior to shipment
- Select materials that are resistant to corrosion and sunlight

#### Masters at Manufacturing

- Suppliers are leaders in their respective industries (i.e., plastic molding, coating application, installation support), which results in a high-quality suppression product
- Thorough qualification process required for major sub-vendors

#### Exceptional Customer Feedback

- "Pleasure to work with, very prompt responses, all documentation in order."
- "Best vendor we've dealt with on this project."
- "Will be in touch again soon to purchase more equipment."
- "Keep up the great work."

For additional information about VIV Solutions products and services, please contact us or visit us online. We look forward to working with you on your next suppression project.
